STAFF AUGMENTATION

BUILD YOUR OWN TEAM

You can choose the team of skilled, proficient and dedicated developers that perfectly matches your business needs and efficiently creates the product with agile methodology. You pay for the week or month of work completed by the team. Ideal for startups which are in initial phase as the product needs to be discovered along the way resulting in less planning and a faster beginning

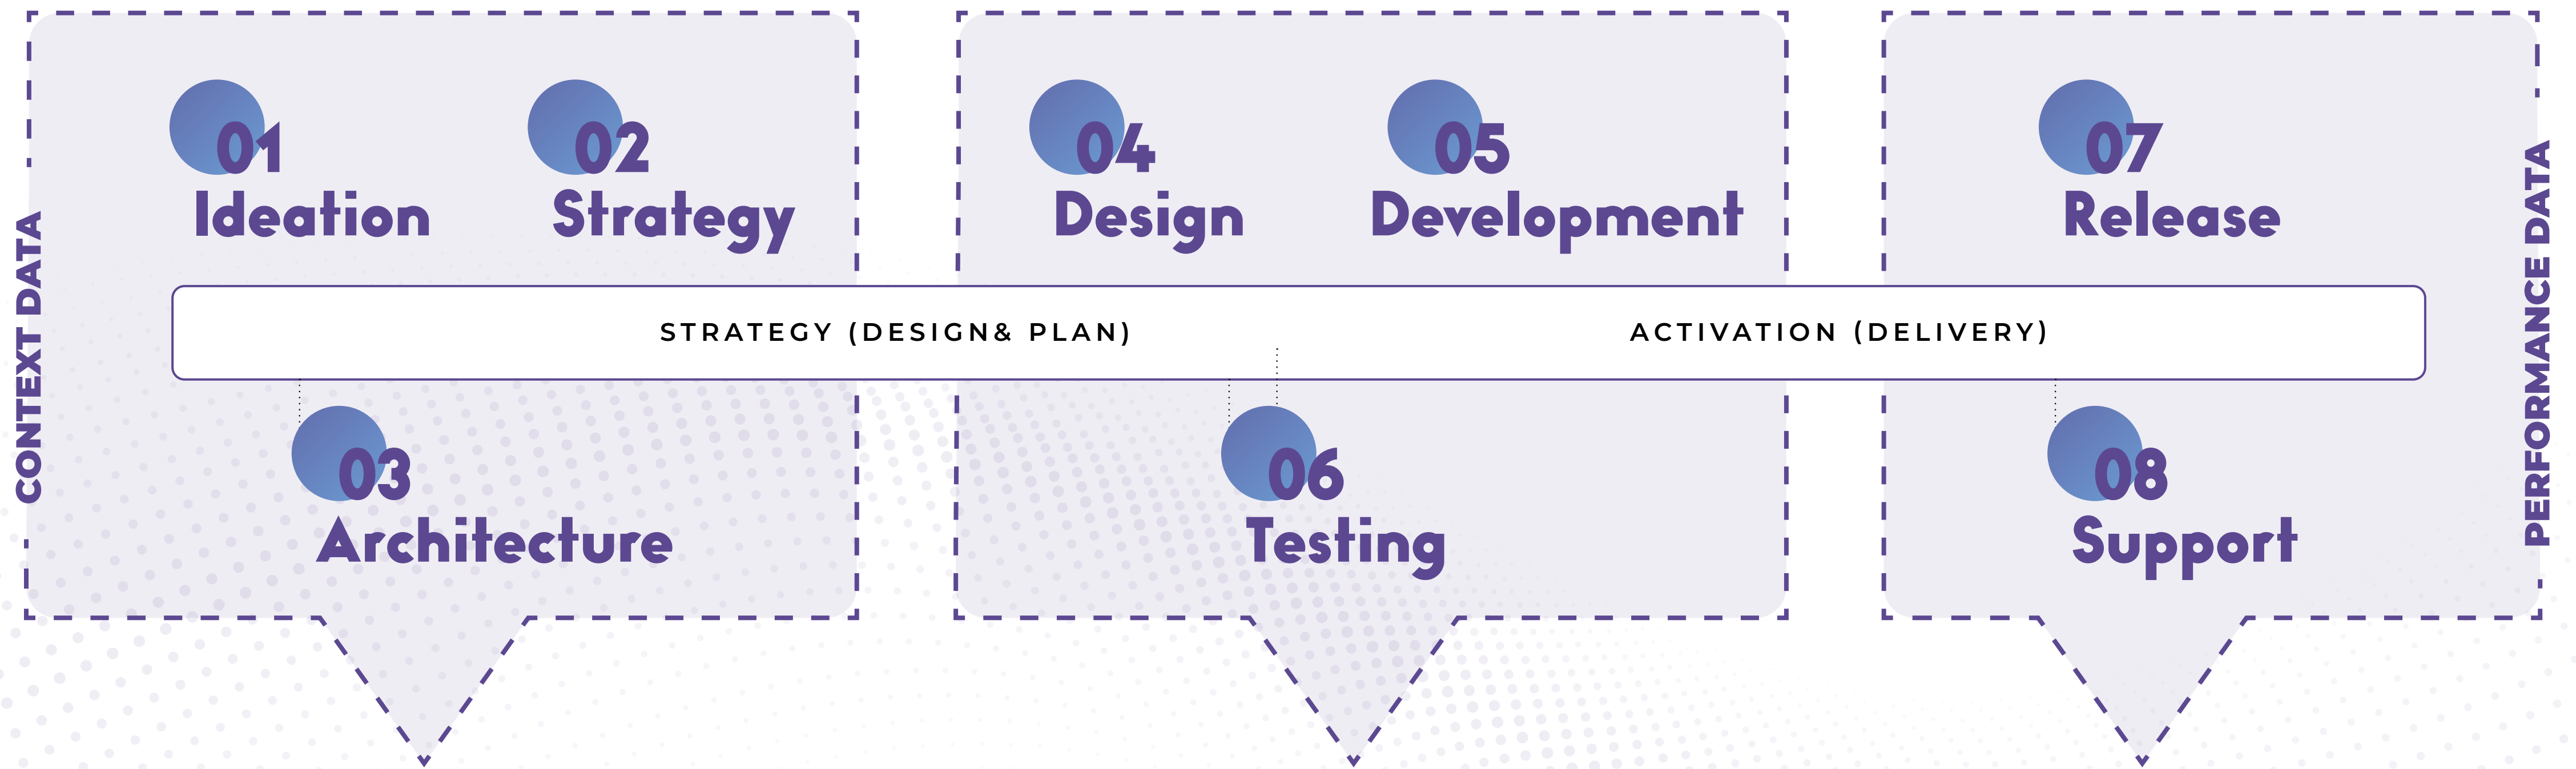

MANAGED FIXED PRICE PRODUCT

Recommended for the projects with a fixed budget as our developers can empower your business with speed, scalability and agility. We take full responsibility of your product from user and market research to design, development and maintenance as this requires more planning and investigation before commencement.

SUPPORT

After product release we offer a complete Support contract, during which our team is always ready to make small regular changes to your project in response to the user feedback in order to make it more user friendly and market competitive.

- Compiled Code
- Code Documentation

Delivery & Support

- Release Management
- Change Management
- User Docs & Training
- Schedule & Maintenance
- Adaptive Maintenance
- Software Roadmap

OUR PROCESS

CASE STUDIES

TRILLIUM FACILITY SOLUTIONS

It's a facility management company in the USA. Their client list includes top-tier global brands, including Amazon, Krispy Kreme, Wal-Mart, Seven Eleven, etc. They have crossed the 20-million-dollar mark (annual revenue) this year and have aggressive plans to grow in the coming year.

BUSINESS PROBLEMS

- Custom ERP/order management software named "Simple FM" used by the Trillium team to handle their day-to-day operations was full of bugs and issues.
- Simple FM being the main driver of different internal business operations was performing poorly, hence impacting the efficiency of all major areas of business that includes order assignment, order fulfillment, bill payments, etc.
- SYNviz first took on the challenge to improve the overall system boost the efficiency and sustainability with updated technology.

SOLUTION PROVIDED BY SYNviz

- With our highly skilled team of software developers we analyzed different problems and found two major issues with the system: poor code quality and tightly coupled code.
- To resolve these, we started redesigning the architecture as part of the V2 version of the app.
- We started optimizing the APIs, which improved their efficiency to 46%, and the response time was within 30 seconds.
- Within six months, we were not only able to stabilize the existing system but also enhance their backend and frontend architecture to support new features.

PAP SOLUTIONS LTD.

It was established in 2010 in Brisbane, Australia, and is an engineering consultancy specializing in the energy industry in the sectors of safety, risk management, engineering, and design through both in-house capability and trusted partners.

BUSINESS PROBLEMS

- They were facing issues in their data visualizations and reporting to generate accurate results and key financial insights by integrating with the real-time data from an accounting platform called XERO.
- They had large amount of data in Xerox, but due to third-party integration limitations, the API exposed by Xerox was only allowing 100 records per call.
- That made it difficult for PAP to have all the data in the Power BI, and without that the reports didn't have accurate results and only had data from a specific time period.

SOLUTION PROVIDED BY SYNIVIZ

- One of our highly skilled backend developers performed the analysis in order to develop multiple Power BI custom connectors' in.net.
- Data was fetched from Xerox in batches and provided all the relevant information to Power BI, where our key data analyst built meaningful and intelligent reports for them.
- We helped them get a visual representation of their overall finances and also provided them with the direction to make the right decisions for their business.

HAIR AND MAKEUP PROS

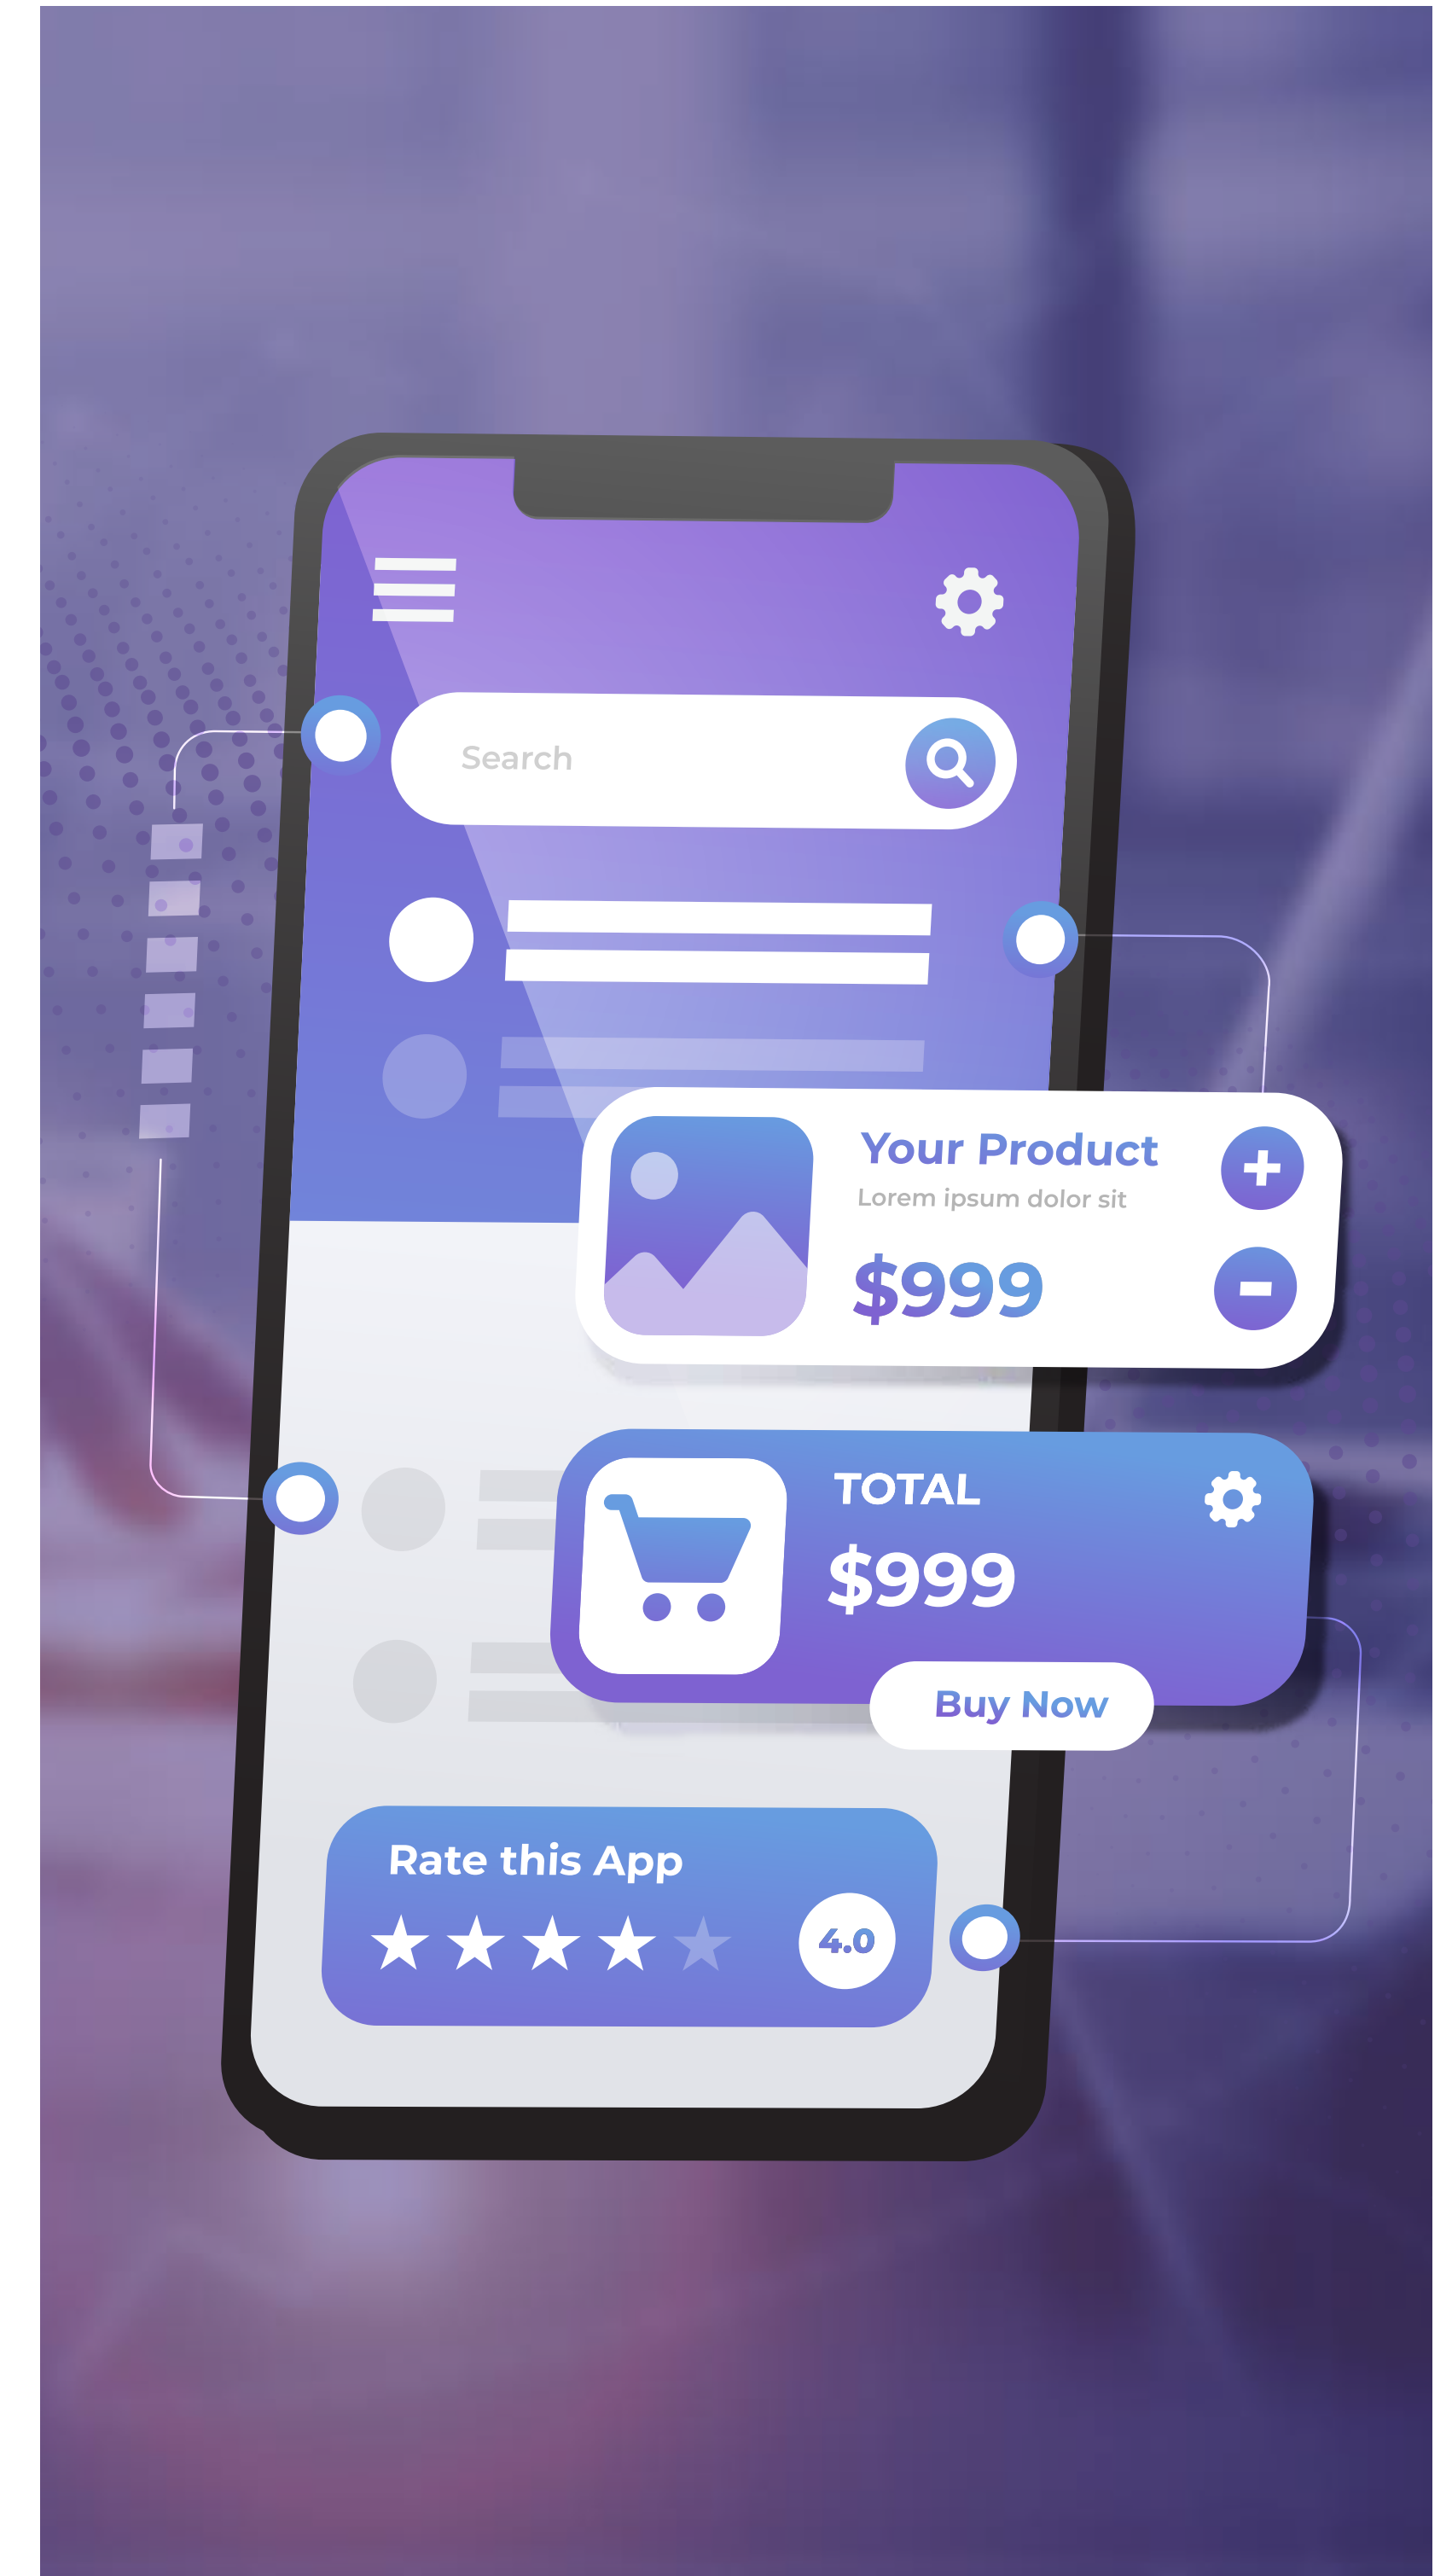

It's a platform that gives a unique hair styling and makeup application experience because finding the right artist for your event can be a daunting task so Hair & Makeup PROS sets the standard for connecting client and artist with ease and success.

BUSINESS PROBLEMS

- Their web application was inefficient, facing UI and scalability issues in terms of adding more features.
- It was a growing business with an increasing client base, so they needed their application to be more stable so that their clients can easily find makeup artists across the United States with easy bookings and registration to become a member and benefit from various discounts.

SOLUTION PROVIDED BY SYNIVIZ

- A team of our highly skilled PHP developers took over the project and the challenge that went along with it.
- We redesigned the architecture in such a way that it didn't impact the current application users and we were still able to improve the design and add more features to the app.
- This strategy helped us to support their existing application as we also redesigned a scalable application, which boosted hair and makeup pros' business revenue by 32%.
- This had a huge impact on their client retention.

WHY CHOOSE SYNIVIZ SOLUTIONS?

We Let Our Work Speak For Itself.

At SYNIVIZ Quality and COST EFFICIENCY is our ultimate business plan. We take in account every aspect which matters to clients' data security and intellectual property protection as we believe that transparency is needed to create trust and loyalty so it core value. SYNIVIZ makes sure to provide a visibility regarding the development process to the clients .
